

Checking LED Light Strips on 86271/86272 50" Wall Mount Fireplace

Tools Needed:

- Phillips Screwdriver

Instructions

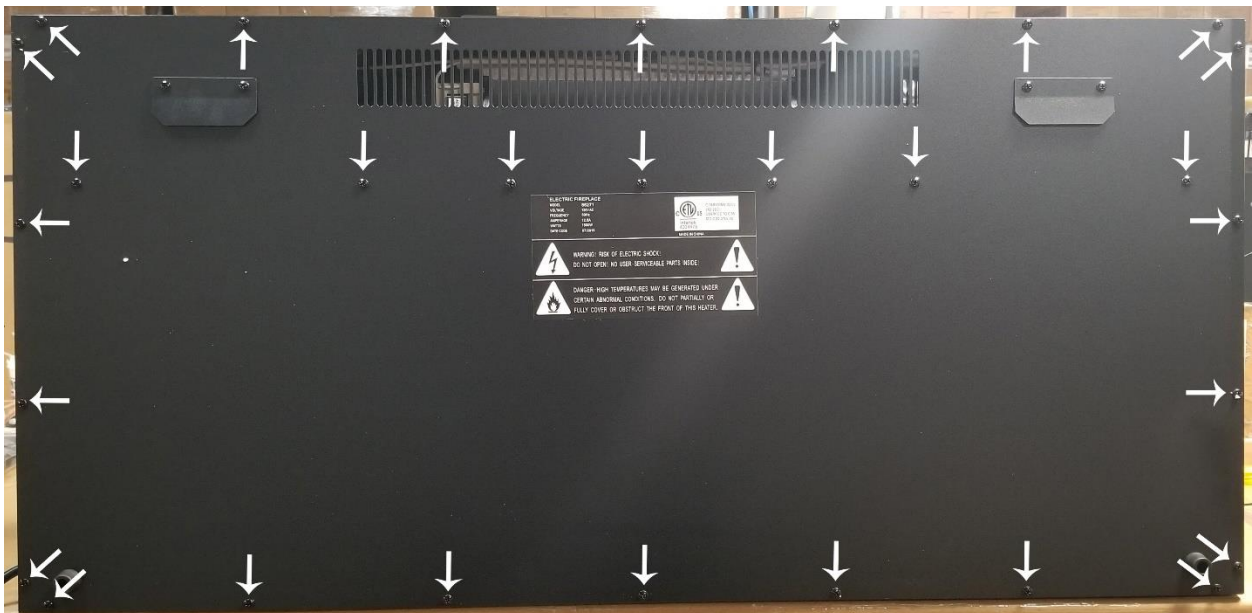

1. Turn off fireplace and remove power plug from outlet.
2. Remove fireplace from wall bracket.
3. Remove back panel from fireplace by removing the screws shown below.

4. Once the back panel is removed, check the LED light strips connections shown below to be sure they are secure and tight.

5. Once complete, reinstall the screws holding the back panel in place.
