

## Removing the Stainless Steel Panel on the 80024/80035 AudioFlare Fireplace

### *Tools Needed:*

- Philips Screwdriver

### *Instructions*

1. Locate the 1 Silver screw on either side of the fireplace and remove screw.

**Left Side of Fireplace**

**Right Side of Fireplace**

2. Lift stainless steel panel straight UP and OUT toward you to remove the panel.

***Note: The screws are for shipping purposes ONLY. They will not be reinstalled after the fireplace is installed in the wall and the glass panel is hooked onto the fireplace.***
