

Accessing LED Light Strips in 80006 Forte Fireplace – 3-color Flames

Tools Needed

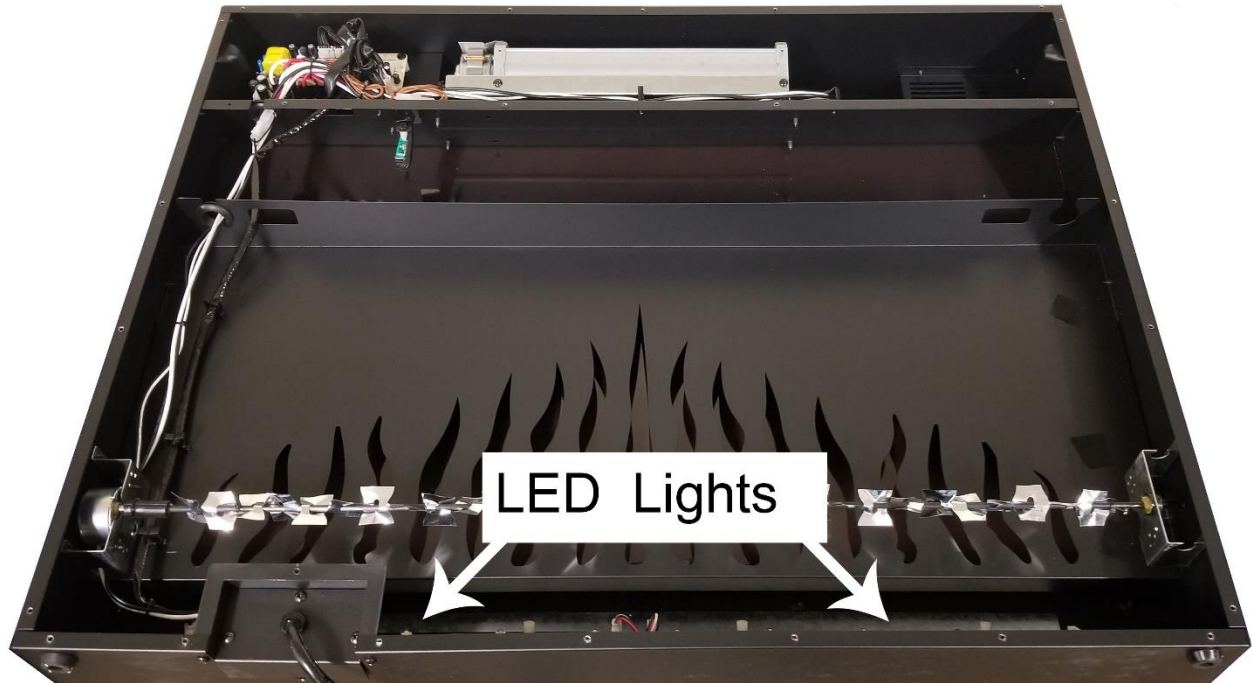

- Phillips-head Screwdriver

Instructions

1. Turn off fireplace and remove the glass panel from the fireplace.
2. Remove the fireplace from the wall and unplug the fireplace from the outlet it is plugged into.
3. Remove wall mount bracket from fireplace (if still attached)
4. Remove the back panel from the fireplace by removing the screws shown below.

5. Once the fireplace is open, you will have access to the LED lights.
