

Instruction

How to switch One Touch Operation / Press & Hold Operation

Step 1

Press and hold "M" button on wired controller, until display "1Un", then release.

Step 2

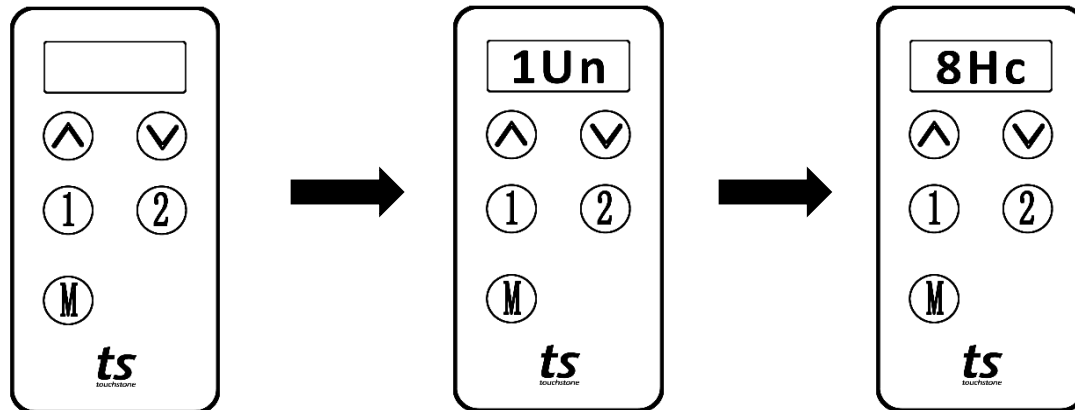

Click "UP" or "DOWN" button to get "8Hc", then press "M" button to get current operation mode.

Step 3

Click "UP" or "DOWN" button to select which mode do you want, then press " M" button for confirmation.
Finished.

"001" is mean Press & Hold Operation mode.

"002" is mean One Touch Operation mode.

Noted: This change is only for RF remote control.
