	Second floor			
	Pet room			
Add appliance	<b>T</b> 1			
	Next, name your device			

5. Name your device and click Save

Cancel

#### What's your device name?

Device name can be used to voice control Google home or Alexa.

# 6. Click the I Know It button on the Tips for using sub device screen

#### Tips for using sub device

SRV TV Lift is currently successfully connected with " sub device mode", and its master device is:

#### 7. Click Use Device Now button

8. Next, buttons for the lift need to be added to the app. Click the Add functions buttons button to add functions.

<	SRV TV Lift							
No button has been learned								
Tap "Add funct your physical re	ion buttons" and learn the buttor	n from						
	Add function buttons							

9. As the SRV/ValueLine wireless remote is a RF remote, select the RF Remote option to start pairing the remote buttons

10. With your SRV/ValueLine TV Lift Wireless RF remote handy, click the Start Learning button in the app to teach the wireless remote buttons to the app.

<	Button learning	
	Button learning can copy the key function of the remote control to the intelligent remote control, so that the intelligent remote control can replace the remote control to directly control the electrical appliances.	
	Please prepare the electrical remote control first	
	O Do not show again	

11. Click the Learn Simple RF Code option

Cancel Button learning

# Please find the remote control of this appliance

Please choose "Learn RF code" if you have the physical remote, otherwise please choose "I don't have physical remote".

12. Follow the instructions in the app to start teaching each remote button to the app. Press and HOLD the any button on the SRV/ValueLine Wireless RF Remote to match the remote to the app. Once the Learning Successfully box pops up, click the Start Learning option.

13. Once the Start Learning button is pressed, you have 30 seconds to pair a button on the SRV/ValueLine Wireless RF remote to the app. To pair the UP button, press the UP button on the SRV/ValueLine Wireless RF remote to pair the button to the app. Press the "clover" button in the app to test the function. The lift should go UP.

14. Once successful, answer YES that the device functioned properly when the button was tapped. On the Congratulations screen, click NEXT.

< Button testing
Please point your physical remote to Wi-Fi smart remote and press once the button you want to learn (DO NOT long-press)
æ
Is the device functioned properly, when the button has been tapped?
No Yes

16. The newly programmed button will now appear on the screen. To add the DOWN button, click the Add Function Buttons at the bottom of the app screen.

17. Follow steps 12-15 to add the DOWN button to the app. Once complete, you will now have both the UP and DOWN button on the app for the lift and can control the lift from the Broadlink app.

18. You can now control your SRV/ValueLine TV Lift through the BroadLink app.

\*\*Please note, there may be up to a 3-5 second delay from when you press a button until when the lift performs that function. It is not recommended to use these functions in close quarters where something above or below the lift hinders the lifts travel.
