* Max TV Height assumes no component shelf installed or components placed below TV. Max TV Height will decrease if component shelf is attached to lift or components are placed below the TV.

Whisper Lift II, Whisper Lift II PRO, and Whisper Lift XL PRO Features and Accessories

Roller Top (included)	Roller on top of lift that pushes lid open when lift is raised.
Flat Top Lid Mount (optional – sku: 25092)	Flat steel plate that attaches to top of lift. Cabinet lid or ceiling material attaches to this plate and moves with the lift.
Add-On Component Shelf (optional – sku: 25021)	Component shelf that attaches to lift and raises/lowers along with the TV. Components, like cable/satellite TV boxes, DVD players, can be placed on shelf for easy access.
Wired Controller (included)	Controller that is connected to lift to control the lift.
Wireless Controller (included)	Wireless remote control for controlling lift. Available in RF (radio-frequency) and IR. RF (Radio Frequency) – operates WITHOUT direct line of sight IR (Infra-Red) – operates WITH direct line of sight
IR (Infra-Red) Controls (Whisper Lift II PRO and XL PRO only)	Receiver sensor provided with lift that plugs into lift control box and raises/lowers lift via infra-red signal received from universal infra-red remote controls that can be paired to lift.
12v Trigger Port (Whisper Lift II PRO and XL PRO only)	3.5mm receiver port in control box that senses an input of 12volts provided by an outside source. Typically referred to as “contact closure”. Constant 12v applied to port – lift raises Removal of 12v from port – lift lowers
