

Pairing Wireless RF Remote To Lift

- 1. Remove power from the lift
- 2. Grab the RF remote and hold in one hand.
- 3. Plug power back into the lift and within 5 seconds of applying power, press the UP button on the RF remote to pair the remote to the lift. If paired successfully, you will hear 2 sets of beeps, signifying that the remote is paired to the control box and lift.

The wireless RF remote control should now be operational.
